HR Department
SAP Labs Viet Nam

Dear HR Department,

I was excited to see the job posting for the Senior Java Developer position at SAP Labs, and I am eager to express my interest. Please find my Curriculum Vitae attached for your consideration.

With over 10 years of experience in full-stack web development, I have a strong command of Java Spring Boot, Spring Security, Node.js JavaScript, web APIs, HTML, and CSS, alongside proficiency in modern frameworks like React.js, Angular.js, Sass, Webpack, and Gulp.

In addition to my development skills, I have a solid background in Linux environments, including writing Dockerfiles and Docker Compose configurations to manage complete web application stacks—covering databases, backends, frontends, message queues, Redis caching, and NGINX for web routing. Additionally, I have a basic understanding of Kubernetes with GCP and am eager to learn more to contribute to the CI/CD process

What excites me most about this opportunity is company culture is focused on collaboration and a shared passion to help the world run better, and the chance to collaborate in a dynamic, international environment. I am confident that my technical expertise and diverse experience align well with your requirements and will enable me to contribute effectively to your team.

I would greatly appreciate the opportunity to discuss how my skills can support your organization's goals. Please feel free to contact me at your convenience via the phone number or email listed above. If you require any additional materials, I would be happy to provide them.

Thank you for considering my application. I look forward to the possibility of speaking with you soon.

Best regards,

Nguyen Dang
